TO WHOM IT MAY CONCERN

Re : Bunclody Engineering Company Ltd., Unit 2,Ryland Road, Bunclody, Co. Wexford.

I have worked with Bunclody Engineering Company Ltd. on both large scale and small scale projects over the last number of years, primarily for Kerry Foods. These projects have ranged from external to high care internal. Bunclody Engineering Company Ltd. have and practice very high standards of Quality, Health & Environmental Protection and they delivered all the projects in an effective manner to a good standard of workmanship, bit it electrical services , electrical panels or electronic controls.

Lynch & Associates as Project Managers found at all times during the course of these Projects that Bunclody Engineering Company Ltd. were co-operative, accommodating and diligent in their role as Electrical Contractor and in their co-operation with the Client, Design Team and other Contractors on site which created positive relationships with all Stakeholders and they were very forthcoming with innovative solutions.

Based on our experience of Bunclody Engineering Company Ltd. performance on completed Projects, Lynch & Associates would recommend Bunclody Engineering Company Ltd. as a very competent and able Contractor.

Billy Lynch
